Subject: RE: Kapalama Military Base - status update

Hello Dennis,

I read through the Workplan and Sampling Analysis Plan for the transformer release at Bldg 905 at the Kapalama Military Reservation. Thank you for submitting a very comprehensive workplan. Once you obtain signatures from HDOT and the contractor, please proceed with implementation of the Workplan - unless there are any changes to the document as a result of HDOT and the contractor's reviews, or if you would like to discuss a different approach for disposal from what is already in the Workplan.

I noticed in the Workplan (and I also recall during one of our conference calls) that there was reference to a PCB equipment inventory in a 2014 EIS for the site. Can you please send me the final EIS document for my record?

Please let me know what date next week works best for you and Myounghee for a call regarding the disposal issue. I would also like Steve Armann to participate on the call as well since he is currently in discussions with HDOH and EPA headquarters on this issue.

Thanks,
Cynthia

Cynthia

Please find the Work Plan and Sampling Analysis Plan for the Kapalama Military Reservation transformer release at Building 905. Please note that we are still awaiting signatures from the State DOT which will take a few more days and also from the contractor. I thought we could at least get a copy to you for review in the meantime and submit signature pages as we get them. Hopefully this acceptable.

I think Myounghee should be on call regarding disposal so maybe we can schedule that for next week.

We look forward to your review and response.

Ok, sounds good. I am around today and tomorrow. I will be out of the office Thursday and Friday of this week (April 2nd and 3rd). I should be around all next week if this week doesn't work out for you. Please let me know what day works best for you. Thanks!

Cynthia

I just provided last set of revisions to DOT yesterday and they are working on signature form Director. You should have shortly.

I call regarding disposal application would be good.

Hello Dennis,

I hope all is well. When you get a chance, can you please provide me with a status update of the PCB activities and the risk-based disposal application submittal for the Kapalama site? Also, if you still have concerns or need any additional clarification regarding the disposal issue with MIS, we can certainly set up a conference call. Please let me know if this is something you're interested in discussing further.

Thanks,
Cynthia
